

Broadview Networks Deploys Latest IP Messaging Technology from Common Voices

Unified Messaging Platform with Patented Migration Process Seamlessly Transitions Customers' Messages to Ensure Business Continuity

BOSTON, MA–June 6, 2007–Common Voices announced today that Broadview Networks, a leading provider of integrated business communications and managed security services in the Northeast and Mid-Atlantic regions, has launched services using a state-of-the-art NowMessage™ Unified Messaging platform. Branded as Broadspeed® Message, the services running on NowMessage will enable Broadview's business customers to improve productivity with advanced features including voicemail, unified messaging, and Text-to-Speech (TTS) services.

To rapidly deliver the new capabilities of Broadspeed Message to its customers, Broadview has ported its current Broadspeed OfficeSuite hosted VoIP customers to the new platform. The migration took advantage of Common Voices' patented NowThere™ technology, which provides a seamless process where greetings and voice messages from Broadview's existing system were transferred to the new IP platform.

“We selected Common Voices because of its proven integration with our existing and planned network elements, and its advanced messaging capabilities,” said Kenneth Shulman, Chief Technology Officer and Chief Information Officer of Broadview Networks. “The NowMessage design allows us to share our existing scalable, redundant and secure email servers and message storage technology, truly integrating our voice and email messaging services into common mailboxes. In addition, Common Voices' open architecture supports the automation of service provisioning and management, which enables a core differentiator at Broadview Networks: providing our customers with rapid service implementation and changes.” Broadspeed Message is a part of Broadview's suite of bundled voice, data, hardware, and managed network solutions, designed to empower small and mid-sized businesses with the right solution, at the right price.

“We are pleased to play a role in Broadview's rapidly expanding network,” said Todd Hasselbeck, President and CEO of Common Voices. “NowMessage is an ideal fit for Broadview's IP-based network, as it supports all of their customer requirements; from basic business lines to hosted-IP telephony on a single, High Availability platform. Our patented migration technology ensures a positive transition experience for Broadview's business customers. Subscribers will retain both new and saved messages and any specialized mailbox greetings, making the migration painless by eliminating the need to transition or recreate critical information currently in their mailboxes.”

About Common Voices (www.CommonVoices.com)

Based in Boston, MA, Common Voices, Inc. is a communications software and professional services company. It develops voice and enhanced services applications for next generation VoIP, wireless and wireline carriers. These applications solve customer service challenges and generate new sources of revenue. The Company also provides hosted services and helps carriers manage network upgrades through its patented migration capability that moves voice and data content between networks, disparate systems and even different operators.

About Broadview Networks (www.BroadviewNet.com)

Broadview Networks is a network-based integrated communications provider serving approximately 70,000 small and mid-sized businesses throughout the Mid-Atlantic and Northeast regions of the U.S. Broadview makes it easy for organizations to implement technologies that solve their infrastructure, security, and productivity challenges. The Company delivers total solutions, integrating local and long distance voice communications; hosted and premise-based VoIP systems; data services encompassing VPN- and MPLS-enabled applications; traditional telephone hardware; high-speed Internet services; and a full suite of managed network security services. Broadview customers benefit from award-winning customer service including a web-based account management tool and a primary point-of-contact for real-time, personal customer care.
